

# HP No. 10 Ink Supplies

**Ideal for business professionals who require fast, easy, reliable and high-quality colour printing solutions, combined with effortless manageability and low cost of operation.**

Individual cartridges and printheads for each colour means only replacing the colour that has run out. Replacing a cartridge does not mean having to replace a printhead – or vice versa – cutting cost and waste, and maximising print quality at all times.

Long-life components allow for longer printing between supply changes. Advanced HP Technology ensures reliable, trouble-free operation, and both the ink cartridges and the printheads are readily available and easy to replace.

HP Smart Technology is embedded in ink cartridges and printheads to maximise print quality. Built-in features monitor print performance and provide constant fine-tuning, with automatic alerts when supplies need replacing.

69 ml pigmented black ink cartridges average 1,750 pages at 5% density. 28 ml dye colour ink cartridges average 1,650 pages at 15% density.

The HP No. 10 Ink Cartridges are separate, high-capacity ink cartridges, which, together with the HP No. 10 Printheads, form the HP Modular Ink Delivery System.
